

Please don't give in to the mass radio producers. Satellite radio provides on demand weather and traffic in a way that regular radio cannot. I don't have to wait for the radio station to give me a traffic or severe weather report when it is convenient for them. I get a report when I need it with satellite radio. The people who are petitioning for a prohibition on satellite radio are the same people who declared that television will be the end of useful broadcasting.

The broadcasters feel threatened by the success of satellite radio. Instead of competing and improving their services, they want the government to protect their businesses by attacking satellite radio. This same group has tried to block every innovative technology that has been warmly welcomed into America's homes and cars. In the 1940's, radio broadcasters tried to squash television. In the 1970's, AM broadcasters tried to put the kibosh on FM stations. They never win and they never learn.
